In this presentation while we feature a number of new technologies, they are not necessarily a recommendation that they are right for your business, you should understand the way they work, their privacy policy and security arrangements before making decisions on whether to use these in your business.

Netwealth Investments Limited (Netwealth) who is a provider of superannuation and investment products and services, and information contained within this presentation about Netwealth's services is of a general nature which does not take into account your individual objectives, financial situation or needs. Any person considering a financial product or service from Netwealth should obtain the relevant disclosure document at www.netwealth.com.au and consider consulting a financial adviser before making a decision before deciding whether to acquire, dispose of, or to continue to hold, an investment in any Netwealth product.

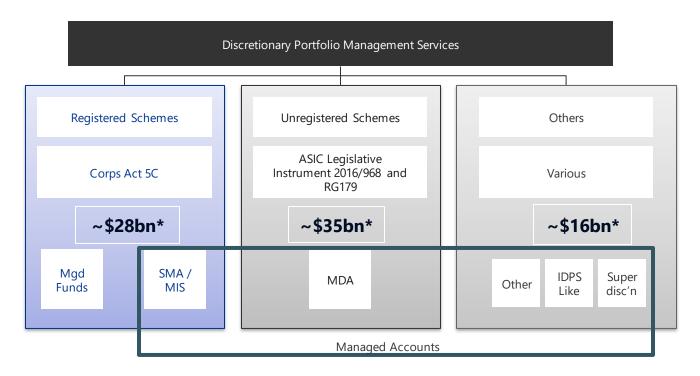

Why Advisers adopt Managed Accounts

1. Better client outcomes

- Continuous service / Demonstrable value
- Customisation
- Use of ASX listed securities e.g. ETFs, Magellan Global
- Ability to reduce costs Manager rebates, more use of passive, use of listed
- 2. Efficiency for adviser practices / Scalability
 - Move out of institutional advice licenses raises the stakes
 - Elimination of SOA's / ROAs
 - Transfer of Best Interest Duty for individual transactions
 - Fit with annual review process & FDS
- 3. Control over investment process
 - "Our" portfolios
 - Engagement of experts directly into client portfolios / Move to professionalism
 - Business differentiation "We are wealth managers" "This is my advice & this is how it should be implemented"
 - Sense of actually delivering "Now I know we can deliver on the promise"
- 4. In some cases, revenue or cost recovery

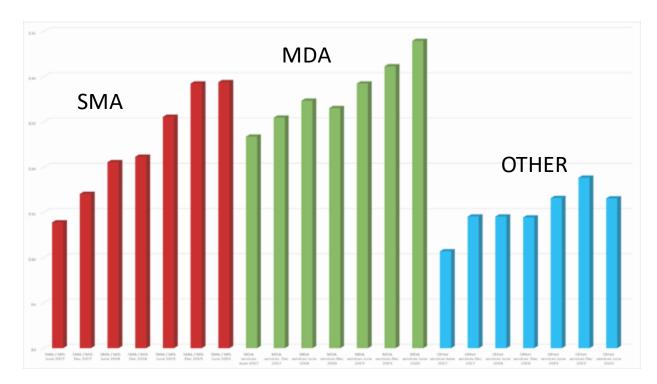

Types of Managed Account

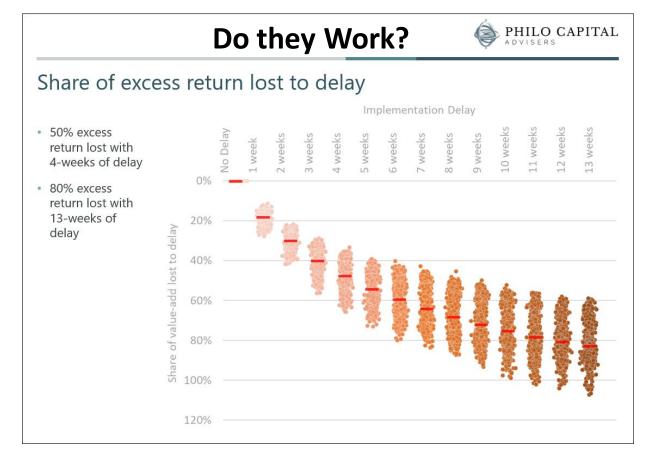

FUM Growth

20 year test, 6 changes p.a., 56% success rate, 5% shift

Source: "Improving Pension Fund Performance", Association for Investment Management and Research, 1998

Level 1: Oversight body Focused on meeting longer term stakeholder outcomes Oversight of roles and responsibilities across the investment process Approves Policies, sets risk appetite and appoints key stakeholders

Level 2: Investment committee

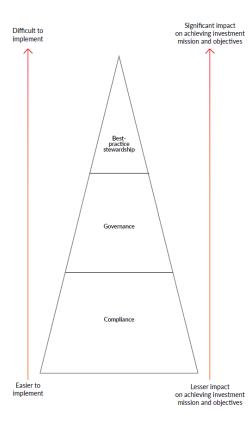

Provides Policy advice to the Oversight Body
 Decides how to allocate assets, monitors performance and managers
 Preferably an independent member present

Level 3: Portfolio management • Management and implementation of the portfolio on a day to day basis • Meeting the investment objective "(To) navigate the increased complexity of portfolios and shortterm pressures, it is important to establish the right feedback mechanisms between governance and implementation of investment policy."

Jarvis, S., & Chua, D. (2018) *Investment Governance: Creating a more performance focused organization.* Blackrock.

Investment expertise

Investment governance expertise

- A commitment to governance is an investment in long-term performance, not a short-term cost.
- Good governance frameworks add value for clients over the long run. Poor governance destroys value.
- Empirical research shows the returns to good governance can be as high as 100bps-300bps per year, over the long-run!
